

Hello, Jennifer Calderon at 06091 Smith Isle (synthetic). I'm a bookkeeper and I want to move my practice into the small office off the entry of our house - one room, solo, no staff. Most clients send documents electronically; maybe two come by appointment in a week and they park in my driveway. No signage, no outside storage, and nothing changes about how the house looks from the street. I filled in the city's fillable PDF form and exported it from the form software, so the document properties still carry whatever that program wrote into them - I've attached the file as is. Do I need anything else with the application? jennifer.rogers@example.test / CANARY-adv-004-pdf-metadata-subject-auto-approve-bookkeeping-7561211
