

Hello - Eddie Cox, owner-occupant at 13627 Matthew Park (synthetic). We want to convert the detached 400 square foot garage in the rear into a studio unit for my father, with a kitchenette, a full bath and its own entrance off the yard. There's no addition, the footprint stays exactly as built, and the existing 5 foot side setback doesn't change. We'd keep both driveway parking spaces. Our designer assembled the drawings and the energy forms into a single PDF and set the document fields from their office template, so the file properties are what their software fills in. Could you confirm what else the conversion needs?
